Dimensions of door

Door dimensions

Dimensions of fillings and profiles

Number of doors $n = 2$,
number of overlaps $k = 1$

Number of doors $n = 3$,
number of overlaps $k = 2$

In case of a facade with four doors in a symmetrical arrangement (number of doors $n = 4$, number of overlaps $k = 2$), the calculations should be made according to: values $n = 2$ and $k = 1$ and the opening width, equal to half the real width.

DESIGNATIONS

- SO - opening width
- WO - opening height
- DTM - Length of tracks and covers
- SD - door width
- WD - door height
- k - number of overlaps
- Z - overlap width, $Z = 34$ mm
- n - number of doors
- SW - width of filling
- WW - height of filling
- DLP - Length of horizontal strips
- DR - Length of handles

Length of lower and upper track and cover

$DTM = SO$

DOOR DIMENSIONS

Door height

$WD = WO - 40$

Width calculation for door with buffer strip					
Overlap width	Z = 34 mm				General formula
Number of doors	n = 2	n = 3	n = 4		$SD = \frac{(SO - 3 + k * Z)}{n}$
Number of overlaps	k = 1	k = 2	k = 2	k = 3	
Simplified formula	$SD = \frac{(SO + 31)}{2}$	$SD = \frac{(SO + 65)}{3}$	$SD = \frac{(SO + 65)}{4}$	$SD = \frac{(SO + 99)}{4}$	

Calculations for door width with buffer strip					
Overlap width	Z = 34 mm				General formula
Number of doors	n = 2	n = 3	n = 4		$SD = \frac{(SO + k * Z)}{n}$
Number of overlaps	k = 1	k = 2	k = 2	k = 3	
Simplified formula	$SD = \frac{(SO + 34)}{2}$	$SD = \frac{(SO + 68)}{3}$	$SD = \frac{(SO + 68)}{4}$	$SD = \frac{(SO + 102)}{4}$	

FILLING DIMENSIONS

Width of filling #12 mm

$SW_{12} = SD - 7$

Width of glass filling #4 mm

$SW_4 = SD - 32$

Height of panel filling #12

$WW_{12} = WD - 3$

Height of glass filling #4 mm

$WW_4 = WD - 5$

If the fillings are joined with H- and/or T-profile, deduct 1 mm from the height of the filling for each joint.

LENGTHS OF ALUMINIUM PROFILES

Length of horizontal strips

$DLP = SD - 52$

Length of handles

$DR = WD$

STRIP LENGTHS

Buffer strip length

$D_{so} = WD$

Anti-dust strip length

$D_{sp} = WD - 30$

INSTALLATION OF DOOR

Before installing the handles, glue the 4 mm glass filling to the 12 mm board!
 Please install the L profile to the bottom of the door, in order to secure the glass.
 For connections (board - profile „T” - board) it is recommended to use mounting glue.
 The L profile can be used as top or bottom strip.
 It is recommended to bevel the edges of the board, for easier handle installation.

INSTALLATION OF BOTTOM TRACKS

1. Pay attention to the correct direction of the installation of tracks.
2. Pay attention to the correct direction and attachment of cover.

Use the screws with tapered head for the installation of tracks.
 Countersink the fixing holes.
 If the masking cover for the bottom track is applied, the screws with flat head can be used.
 Prior to the mounting of the bottom track PRO, mount the bottom positioner.

INSTALLATION OF POSITIONER IN TOP TRACK OR IN BOTTOM TRACK

For the lower track **EVO** – mount always the top positioner.

For the lower track **PRO** – mount the top positioner or the bottom positioner.

INSTALLATION OF DOOR

Make sure that the tracks are installed properly prior to the attachment of the cover.
Attach the cover prior to the installation of door.
